

Why Should You Refer to The Djawdan Center?

The life of a dentist can be busy and hectic. Patients who have experienced the loss of multiple teeth or substantial bone and tooth structure can require significant time and multiple appointments in order to satisfy their needs, which can cause the dentist additional stress. By referring to The Djawdan Center, you acquire colleagues who can take the time to treat patients who have specific expectations and multiple dental traumas. The Djawdan Center provides you with the freedom to perform the dental procedures you enjoy the most while also ensuring that your patients always receive excellent care.

We ALWAYS offer complimentary consultations to include diagnostic imaging.

You may want to refer your patient to The Djawdan Center if:

- Their treatment requires several specialists
- They require intricate esthetic procedures
- They need complex implant restorations
- Your patient has a particularly challenging dental case
- Your patient needs IV sedation

Please contact us at 410-266-7645 if you have any questions about referring your patients to our Implant and prosthodontist office in Annapolis, MD. We appreciate your consideration and giving us the opportunity to help you and your patients.

Kindest Regards, Drs. Kian Djawdan & Stephen M. Cross

MEET DR. DJAWDAN

Dr. Kian Djawdan completed his graduate program at Tufts University in Boston. After receiving his DMD degree in 1992, he completed a two year residency program at the VA Hospital and Medical College of Virginia. His residency program training

focused on IV sedation, surgical placement and restoration of dental implants. Dr. Djawdan held the prestige position of Chief Resident during his second year.

Dr. Djawdan is Board Certified by the American Board of Implantology/Implant Dentistry and is considered an expert in implant dentistry.

Dr. Djawdan is specially trained and licensed to administer IV sedation for any surgical or restorative dental procedure. He is among a small group of dentists with the advanced training, experience and credentials to personally handle both the surgical and restorative aspects of treatment.

Training never ends. Advanced technical skills and artistic perspective demand hundreds of hours of ongoing training and education, says Dr. Djawdan.

MEET DR. CROSS

Dr. Stephen Cross received his Doctor of Dental Surgery (DDS) degree in 2017 from the University of Maryland School of Dentistry. After graduation he went on to complete his specialty training in Advanced Prosthodontics at the University of Pennsylvania School

of Dental Medicine.

Dr. Cross is currently a board eligible candidate for board certification in prosthodontics from the American Board of Prosthodontics. To be board certified means to have demonstrated exceptional knowledge and skills in the field of prosthodontics. The American Board of Prosthodontics seeks out candidates who are committed to continuing education, value ethical practices and have a patient-first approach, and who are committed to the advancement of prosthodontics.

Dr. Cross' specialty training makes him uniquely positioned to diagnose, treatment plan and execute treatment of patients with highly complex prosthetic and implant needs. He offers treatments that include complete fixed or removable dental prostheses, implant prosthetics, crowns, bridges, and any combination of these plans.
